Welcome to the second Port Macquarie Ezitree Users Group Meeting for 2011. We both hope that the current inclement weather is not causing you or your families any grief and we ALL hope it ends soon.

The dates of the Ezitree User Group meetings for the remainder of 2011 are as follows:

28th May

24th September

22nd October

26th November

Recent Scams

Log Me In

Briefly, you will receive an unsolicited telephone call from India and you are asked for by name. The caller indicates your computer is causing internet problems and you are directed to Windows Event Viewer where you can see a long list of errors. By convincing you these are 'real' errors which may result in your computer not working, you are asked to allow their 'Genuine Microsoft Gold Certified Technician' to log onto your computer to fix the problems. A demand is then made for payment of this 'service' (£185 in one case in England) before the technician will release the computer back to you. The main thing here to remember is **never let any person log onto your computer over the internet unless you know them or are satisfied as to the bona fides of the company where they are employed.** (Source: Rex Toomey)

Fake DNA Kits.

A scam involving a bogus DNA kit is turning up in Australia and New Zealand letterboxes. An accompanying letter asks for a fee in exchange for a swab of the householder's saliva so the scamming company can predict the person's future health prospects. People are asked for a \$39.99 processing fee and their credit card details. The kit is from China, although the return address is in the Netherlands. The kit looks professional but is actually bogus. A letter in the kit claims that if you return a swab of your saliva the company, DNA Technologies, will calculate and predict things about you such as your future success, physical and mental health, affluence, significant accomplishment and your "deepest sense of individual fulfilment". (Source: FamNet Newsletter - www.famnet.net.nz)

Today's Upgrade Ezitree Disk

The disk version released today is v12.04.0084. Due to other commitments with which we have been involved, there have been very few changes and enhancements since the last user group meeting, the more important of these being:

- * Research Diary - Set Purpose field yellow (mandatory) during edit
- * Source Usage Edit - Fixed error when image button clicked and no image is linked
- * Text Window - Importing Memo - Fixed Save button not enabled when memo imported
- * Event Residence - Removed autocase control
- * Siblings - Fixed parent names shown reversed
- * **Relationships - Fixed error when displaying the relationship between 2 persons (from v12.04.67)**
- * Relationships - Between 2 persons now comply to display of record numbers option
- * Witnesses - Linked - Added date validation to witness date
- * Witnesses - Linked - Set First Name field background to yellow as mandatory
- * Witnesses - Linked - Completely re-wrote to allow update of some linked witness data
- * Chart Options - Fixed drop down list for Group Code to allow new code to be entered
- * Duplicates - Several fixes and enhancements

The Help windows are still currently in the process of being re-written and updated using new software and it is hoped they will be finished by the next meeting. The updated help file will be placed on the Ezitree website for downloading.

Today's Topics: Linked Witnesses and the Family Tree Book

Linked Witnesses – Details Recent Changes.

A blank 'Witness' window when first opened

When you create an event for a person, there may be others present who are not directly involved but may be useful to record for proof of relationship or for information purposes. These persons include witnesses to a marriage, informant on a death certificate or sponsor at a baptism.

Ezitree allows you to add these third party persons as either a notation (that is 'unlinked') or as a 'linked' record.

By linking the two persons together, Ezitree will record the notation and create a 'witness' event for the third party person. In this example, the term witness will be used, however it is the same for a sponsor, informant, etc.

Whilst this functionality has been available for some time now, a recent comment by an Ezitree user, led to this functionality being updated and improved.

Main Changes:

1. The Occupation of the linked witness may now be added. For example, the father may be the witness and his occupation shown as 'timber getter'.
2. The note field that will appear on the linked witness event is now editable from the original person's record. This removes the need to go to the linked person's record to edit the computer generated text.
3. A Change button has been added to the window so that changes can now be made to parts of the linked witness event from the original person's record.
4. The identification of the linked person has been changed from their Record Number e.g. 'Roger Jones (#1245)' to a simple flag, e.g. 'Roger Jones (L)'.

A linked 'Witness' has been added

Today's Upgrade Ezitree Disk

The disk version released today is v12.04.0084. Due to other commitments with which we have been involved, there have been very few changes and enhancements since the last user group meeting, the more important of these being:

- * Research Diary - Set Purpose field yellow (mandatory) during edit
- * Source Usage Edit - Fixed error when image button clicked and no image is linked
- * Text Window - Importing Memo - Fixed Save button not enabled when memo imported
- * Event Residence - Removed autocase control
- * Siblings - Fixed parent names shown reversed
- * **Relationships - Fixed error when displaying the relationship between 2 persons (from v12.04.67)**
- * Relationships - Between 2 persons now comply to display of record numbers option
- * Witnesses - Linked - Added date validation to witness date
- * Witnesses - Linked - Set First Name field background to yellow as mandatory
- * Witnesses - Linked - Completely re-wrote to allow update of some linked witness data
- * Chart Options - Fixed drop down list for Group Code to allow new code to be entered
- * Duplicates - Several fixes and enhancements

The Help windows are still currently in the process of being re-written and updated using new software and it is hoped they will be finished by the next meeting. The updated help file will be placed on the Ezitree website for downloading.

Today's Topics: Linked Witnesses and the Family Tree Book

Linked Witnesses – Details Recent Changes.

The screenshot shows a software window titled "EZITREE - Persons recorded as an Informant on this Birth event". It contains two main sections: "Unlinked Informant" and "Linked Informant". The "Unlinked Informant" section has a text input field for the name and buttons for "Add", "Change", and "Delete". The "Linked Informant" section has fields for "First Name", "Last Name", "Gender" (with radio buttons for Male, Female, and Unknown), "Number", "Occupatio" (with a value of 0000), "Residence", "Date - Day" (with values 00, 00, 0000), and "Notes". At the bottom, there are buttons for "New Person", "Select...", "Change", and "Delete", along with "Autocase" (No/Yes), "Foreign Ch..", "Close", and "Help...".

A blank 'Witness' window when first opened

When you create an event for a person, there may be others present who are not directly involved but may be useful to record for proof of relationship or for information purposes. These persons include witnesses to a marriage, informant on a death certificate or sponsor at a baptism.

Ezitree allows you to add these third party persons as either a notation (that is 'unlinked') or as a 'linked' record.

By linking the two persons together, Ezitree will record the notation and create a 'witness' event for the third party person. In this example, the term witness will be used, however it is the same for a sponsor, informant, etc.

Whilst this functionality has been available for some time now, a recent comment by an Ezitree user, led to this functionality being updated and improved.

Main Changes:

1. The Occupation of the linked witness may now be added. For example, the father may be the witness and his occupation shown as 'timber getter'.
2. The note field that will appear on the linked witness event is now editable from the original person's record. This removes the need to go to the linked person's record to edit the computer generated text.
3. A Change button has been added to the window so that changes can now be made to parts of the linked witness event from the original person's record.
4. The identification of the linked person has been changed from their Record Number e.g. 'Roger Jones (#1245)' to a simple flag, e.g. 'Roger Jones (L)'.

The screenshot shows the same software window as before, but now with a linked witness record. The "Persons Currently Shown as a Informant" list at the top contains "Roger JONES" with a "Linked" type. The "Linked Informant" section is populated with the following information: First Name: Roger, Last Name: JONES, Gender: Male (selected), Number: 00001245, Occupation: 0012 Crane Driver, Residence: Mccleay River, Date - Day: 12/03/1846 Thursday, and Notes: Roger was an informant at the birth of Eliza Jane COOK. The "Change" button at the bottom is now active.

A linked 'Witness' has been added

Welcome to the second Port Macquarie Ezitree Users Group Meeting for 2011. We both hope that the current inclement weather is not causing you or your families any grief and we ALL hope it ends soon.

The dates of the Ezitree User Group meetings for the remainder of 2011 are as follows:

28th May

24th September

22nd October

26th November

Recent Scams

Log Me In

Briefly, you will receive an unsolicited telephone call from India and you are asked for by name. The caller indicates your computer is causing internet problems and you are directed to Windows Event Viewer where you can see a long list of errors. By convincing you these are 'real' errors which may result in your computer not working, you are asked to allow their 'Genuine Microsoft Gold Certified Technician' to log onto your computer to fix the problems. A demand is then made for payment of this 'service' (£185 in one case in England) before the technician will release the computer back to you. The main thing here to remember is **never let any person log onto your computer over the internet unless you know them or are satisfied as to the bona fides of the company where they are employed.** (Source: Rex Toomey)

Fake DNA Kits.

A scam involving a bogus DNA kit is turning up in Australia and New Zealand letterboxes. An accompanying letter asks for a fee in exchange for a swab of the householder's saliva so the scamming company can predict the person's future health prospects. People are asked for a \$39.99 processing fee and their credit card details. The kit is from China, although the return address is in the Netherlands. The kit looks professional but is actually bogus. A letter in the kit claims that if you return a swab of your saliva the company, DNA Technologies, will calculate and predict things about you such as your future success, physical and mental health, affluence, significant accomplishment and your "deepest sense of individual fulfilment". Fake DNA Kits.

A scam involving a bogus DNA kit is turning up in Australia and New Zealand letterboxes. An accompanying letter asks for a fee in exchange for a swab of the householder's saliva so the scamming company can predict the person's future health prospects. People are asked for a \$39.99 processing fee and their credit card details. The kit is from China, although the return address is in the Netherlands. The kit looks professional but is actually bogus. A letter in the kit claims that if you return a swab of your saliva the company, DNA Technologies, will calculate and predict things about you such as your future success, physical and mental health, affluence, significant accomplishment and your "deepest sense of individual fulfilment". Today's Upgrade Ezitree Disk

The disk version released today is v12.04.0084. Due to other commitments with which we have been involved, there have been very few changes and enhancements since the last user group meeting, the more important of these being:

- * Research Diary - Set Purpose field yellow (mandatory) during edit
- * Source Usage Edit - Fixed error when image button clicked and no image is linked
- * Text Window - Importing Memo - Fixed Save button not enabled when memo imported
- * Event Residence - Removed autocase control
- * Siblings - Fixed parent names shown reversed
- * **Relationships - Fixed error when displaying the relationship between 2 persons (from v12.04.67)**
- * Relationships - Between 2 persons now comply to display of record numbers option
- * Witnesses - Linked - Added date validation to witness date
- * Witnesses - Linked - Set First Name field background to yellow as mandatory
- * Witnesses - Linked - Completely re-wrote to allow update of some linked witness data
- * Chart Options - Fixed drop down list for Group Code to allow new code to be entered
- * Duplicates - Several fixes and enhancements

The Help windows are still currently in the process of being re-written and updated using new software and it is hoped they will be finished by the next meeting. The updated help file will be placed on the Ezitree website for downloading.

Today's Topics: Linked Witnesses and the Family Tree Book

Linked Witnesses – Details Recent Changes.

The screenshot shows a software window titled "EZITREE - Persons recorded as an Informant on this Birth event". It has a table at the top with columns "Persons Currently Shown as a Informant" and "Type". Below this are sections for "Unlinked Informant" and "Linked Informant". The "Unlinked Informant" section has a text field for "Informant" and buttons for "Add", "Change", and "Delete". The "Linked Informant" section has fields for "First Name", "Last Name", "Gender" (with radio buttons for Male, Female, Unknown), "Number", "Occupatio" (with value 0000), "Residence", "Date - Day" (with values 00, 00, 0000), and "Notes". At the bottom are buttons for "New Person", "Select...", "Change", "Delete", "Autocase" (with radio buttons for No, Yes), "Foreign Ch..", "Close", and "Help...".

A blank 'Witness' window when first opened

When you create an event for a person, there may be others present who are not directly involved but may be useful to record for proof of relationship or for information purposes. These persons include witnesses to a marriage, informant on a death certificate or sponsor at a baptism.

Ezitree allows you to add these third party persons as either a notation (that is 'unlinked') or as a 'linked' record.

By linking the two persons together, Ezitree will record the notation and create a 'witness' event for the third party person. In this example, the term witness will be used, however it is the same for a sponsor, informant, etc.

Whilst this functionality has been available for some time now, a recent comment by an Ezitree user, led to this functionality being updated and improved.

Main Changes:

1. The Occupation of the linked witness may now be added. For example, the father may be the witness and his occupation shown as 'timber getter'.
2. The note field that will appear on the linked witness event is now editable from the original person's record. This removes the need to go to the linked person's record to edit the computer generated text.
3. A Change button has been added to the window so that changes can now be made to parts of the linked witness event from the original person's record.
4. The identification of the linked person has been changed from their Record Number e.g. 'Roger Jones (#1245)' to a simple flag, e.g. 'Roger Jones (L)'.

The screenshot shows the same software window as before, but now populated with data. The "Persons Currently Shown as a Informant" table has one entry: "Roger JONES" with "Type" "Linked". The "Unlinked Informant" section is empty. The "Linked Informant" section has the following data: "First Name" "Roger", "Last Name" "JONES", "Gender" "Male", "Number" "00001245", "Occupatio" "0012" with "Crane Driver" in a sub-field, "Residence" "Mccleay River", "Date - Day" "12" "03" "1846" with "Thursday" in a sub-field, and "Notes" "Roger was an informant at the birth of Eliza Jane COOK.". The "Change" button at the bottom is now active.

A linked 'Witness' has been added

Welcome to the second Port Macquarie Ezitree Users Group Meeting for 2011. We both hope that the current inclement weather is not causing you or your families any grief and we ALL hope it ends soon.

The dates of the Ezitree User Group meetings for the remainder of 2011 are as follows:

28th May

24th September

22nd October

26th November

Recent Scams

Log Me In

Briefly, you will receive an unsolicited telephone call from India and you are asked for by name. The caller indicates your computer is causing internet problems and you are directed to Windows Event Viewer where you can see a long list of errors. By convincing you these are 'real' errors which may result in your computer not working, you are asked to allow their 'Genuine Microsoft Gold Certified Technician' to log onto your computer to fix the problems. A demand is then made for payment of this 'service' (£185 in one case in England) before the technician will release the computer back to you. The main thing here to remember is **never let any person log onto your computer over the internet unless you know them or are satisfied as to the bona fides of the company where they are employed.** (Source: Rex Toomey)
